

PL/SQL Exercise 1: Control Structures

Scenario 1: The bank wants to apply a discount to loan interest rates for customers above 60 years old.

- **Question:** Write a PL/SQL block that loops through all customers, checks their age, and if they are above 60, apply a 1% discount to their current loan interest rates.

Customers Table:

	CUSTOMERID	CUSTOMERNAME	AGE	INTERESTRATE
1	101	Rahul	65	10.5
2	102	Ananya	45	11
3	103	Vikram	70	12
4	104	Priya	58	10
5	105	Kiran	62	11.5

Query Output:

	CUSTOMERID	CUSTOMERNAME	AGE	INTERESTRATE
1	101	Rahul	65	9.5
2	102	Ananya	45	11
3	103	Vikram	70	11
4	104	Priya	58	10
5	105	Kiran	62	10.5

Scenario 2: A customer can be promoted to VIP status based on their balance.

- **Question:** Write a PL/SQL block that iterates through all customers and sets a flag IsVIP to TRUE for those with a balance over \$10,000.

Customers Table:

	CUSTOMERID	CUSTOMERNAME	BALANCE	ISVIP
1	101	Rahul	15000	false
2	102	Ananya	8000	false
3	103	Vikram	25000	false
4	104	Priya	9500	false
5	105	Kiran	12000	false

Query Output:

	CUSTOMERID	CUSTOMERNAME	BALANCE	ISVIP
1	101	Rahul	15000	true
2	102	Ananya	8000	false
3	103	Vikram	25000	true
4	104	Priya	9500	false
5	105	Kiran	12000	true

Scenario 3: The bank wants to send reminders to customers whose loans are due within the next 30 days.

- **Question:** Write a PL/SQL block that fetches all loans due in the next 30 days and prints a reminder message for each customer.

Loans Table:

	LOANID	CUSTOMERNAME	DUE DATE
1	201	Rahul	7/2/2026, 8:52:03 AM
2	202	Ananya	7/17/2026, 8:52:03 AM
3	203	Vikram	8/1/2026, 8:52:03 AM
4	204	Priya	7/7/2026, 8:52:03 AM
5	205	Kiran	8/21/2026, 8:52:03 AM

Query Output:

```
Reminder: Dear Rahul, your loan is due on 02-JUL-26
Reminder: Dear Ananya, your loan is due on 17-JUL-26
Reminder: Dear Priya, your loan is due on 07-JUL-26
```

```
